Get more from your most valuable resource

Across your organization, you have invested significant time and money in a variety of business-critical resources, including physical, financial, intellectual, and human. Above and beyond those resources, today's enterprises consider time their most valuable asset. As such, enterprises need to ensure time is well spent across the business and the IT environment.

Up until now, organizations focused on streamlining reliability and management tasks to help them accomplish more in less time. But remaining competitive in today's super-fast and ever-evolving marketplace requires something more. Achieving success requires new strategies that optimize the entire IT environment, while also working in concert with IT teams to deliver better and more profitable business outcomes.

Such a strategy ensures all your time—not just a select percentage—is well spent. And that's what HPE Complete Care Service is all about.

HPE Complete Care Service by the numbers

- **Zero** dissatisfied customers¹
- **Easier**—60% reduction in incident management time, and 80% reduction in time spent managing vendors²
- **Cheaper**—28% more efficient IT Operations Management³
- **Safer**—35% of after-hours incidents proactively prevented⁴
- **98%** of customers agree their assigned team was valuable in reducing risk in their environment⁵

^{1, 2, 3, 4} HPE customer satisfaction survey, internal reporting, 2020.

⁵ TechValidate customer survey, 88B-272-5B8, November 2020.

Perfect complement to your IT staff

Rather than add permanent employees to your roster, you can use HPE Complete Care Service to complement your organization's skills and capabilities. You can mix and match any HPE service offerings with different elements of your IT solutions or data center. As your IT environment becomes increasingly diverse, HPE Complete Care Service experts understand the unique support requirements of each component and your IT environment as a whole.

A complete solution for all your IT needs

Much more than a typical service offering, HPE Complete Care Service is a modular, edge-to-cloud IT environment service. By following a proven holistic approach, HPE Complete Care Service can optimize your entire IT environment from edge to cloud.

- **Personalize your experience**—HPE Complete Care Service adapts to your individual needs and goals.
- **Optimize your outcomes**—Do more for less by optimizing your time, technology, and decision-making processes for every facet of your IT environment, edge to cloud.
- **Transform your IT**—Approach your entire environment holistically and measure success by achieving specific and agreed-upon IT outcomes.

Cutting-edge features drive better outcomes

HPE Complete Care Service helps you meet your service-level targets and business objectives by providing cutting-edge features designed to drive better outcomes for your business:

- Complete coverage for all your IT, which means every asset from edge to cloud is considered in the service and support strategy
- Assigned account team, including a dedicated expert managing your team of resources
- Modular and personalized services based on your needs, goals, workloads, and desired outcomes
- Enhanced incident-management experience via an online portal, offering priority access, accelerated escalation management, incident reporting and analysis, and more
- Digitally enabled and AI-driven service

HPE Complete Care Service—features

Building on a set of core features—and extended through outcome- and product-specific building blocks—HPE Complete Care Service offers the comprehensive services you need not only to ensure your time is well-spent but also to keep your business operating at optimal efficiency.

Product support

Each product within your HPE Complete Care Service IT environment starts with a base product support layer of HPE Tech Care Service—an artificial intelligence (AI)-powered and digitally enabled service experience that drives your business forward. HPE Tech Care Service goes beyond traditional support by providing faster access to product-specific experts, an AI-driven digital experience, and general technical guidance to reduce risk and constantly search for ways to do things better.

- **General technical guidance** helps you get the most from your IT with expert technical advice for operation, optimization, and IT management.
- **Product-specific experts** mean no more managing complex escalations.
- **An AI-powered digital experience** delivers faster outcomes at every stage.

HPE Complete Care Service core service offerings

The next layer in your HPE Complete Care Service includes the following core services.

Enhanced incident management (EIM)

To provide an outstanding incident management experience, this set of integrated and accelerated reactive and proactive processes is designed to address hardware and software incidents. These processes, which are tailored to your unique needs, engage appropriate HPE product experts to address critical covered support incidents for quicker resolution.

- Environment profiling and awareness
- Multi-channel access to know-me experts
- Personalized phone experience
- Remote 24/7 rapid response
- Priority access
- Seamless expert collaboration for resolving complex issues
- Accelerated escalation management
- Personalized digital experience
- Expanded coverage options
- Global call management (optional)

Service relationship management (SRM)

Three experience levels (entry, basic, standard)—including assigned HPE resources—understand your business and IT objectives and work to ensure your needs are met.

- Assigned account team; your advocate and single point of contact for both operational and technical needs, coordinating the delivery of all features of HPE Complete Care Service; includes Account Support Manager (ASM), Technical Account Manager (TAM), and Assigned Customer Engineer (ACE)
- Account support planning
- Service implementation management
- Inventory management
- Service planning and review
- Support activity review or incident report
- Operational and technical advice or operational assistance
- HPE Support Center
- HPE education planning and assistance
- HPE Digital Learner Starter Pack for HPE Complete Care Service

Modular solution blocks

In addition to the core services, HPE Complete Care Service also offers outcome-specific modular solution blocks designed to help you optimize and modernize your IT environment and achieve your business goals. Currently available solution blocks include:

- Performance Optimization Service—Storage
